

SKO' GET YOUR KIDS VACCINATED!

PROTECT YOUR CHILDREN | PROTECT OUR RELATIVES

▶▶▶ COVID-19 vaccines are now available to everyone.

Our children and youth are safest when they are up-to-date on their COVID-19 vaccines.

▶▶▶ Vaccinating children and youth protects all of our relatives.

People of any age who are up-to-date on their vaccines are less likely to spread the virus to others.

Contact your pediatrician or local Tribal Health facility to **schedule your child's vaccination.**

SAFE & EFFECTIVE

- The COVID-19 vaccines have been proven safe for children, youth, and adults of different ages and ethnicities.
- COVID-19 vaccines do not affect puberty or future fertility.

SIDE EFFECTS ARE NORMAL

Side effects do not mean your child has COVID-19.

Side effects are a normal sign your child's body is learning how to fight COVID-19.

Mild side effects may include:

- Pain or swelling on the arm where the vaccine is given
- Tiredness
- Headache
- Muscle pain
- Chills
- Fever
- Nausea
